

Hello World!
My name is Jérôme Haas and
I love to build smart
solutions for the web.

Ever since I wrote my first line of code, I have been captivated by web development, which offers endless opportunities for problem-solving and connecting people digitally. With a keen interest in both frontend and backend development, I am dedicated to becoming the best fullstack developer I can be.

Outside of work, I enjoy backpacking in distant lands, running through forests and fields, or delving into my favorite IDE, continually seeking new technologies and methods to enhance my skills and expand my technical knowledge.

« The web does not
just connect
machines, it
connects people. »

Tim Berners-Lee
